Structure of the Proceedings

- **Volume 1:**
  - Copper
  - Precious Metals
  - Waste Effluent Treatment/Biohydrometallurgical Applications
  - Process Metallurgy
  - Bridging Non-Ferrous and Ferrous Metallurgy

- **Volume 2:**
  - Lead and Zinc
  - Light Metals
  - Sustainable Technologies/Sustainability of Non-Ferrous Metals Production
  - Process Control/Process Modelling
  - Waste Heat Recovery by ORC Power Generation

- **Volume 3:**
  - General Hydrometallurgy
  - General Pyrometallurgy/Vessel Integrity/Process Gas Treatment
  - Recycling
  - Posters
  - Authors Index
  - Keywords Index
Table of Contents – Volume 2

Lead and Zinc

Alternative Method for Copper Removal from Lead by Application of Aluminum
Mgr inż. Andrzej Cybulski, Dr inż. Ryszard Prajsnar

Improving Occupational Hygiene in Primary Lead Production
Dipl. Ing. Knut Esser, Dr. Ing. Urban Meurer

Zinc and Copper Recovery from Diluted Solutions Produced after Gold Concentrate Oxidation
C. Frias, S. Rodriguez, I. Castellano, Y. Lefevre

Hydrometallurgical Processing of Primary Lead: A Critical Review
C. Frias, J. Gotor, E. Delgado

Outotec® Ausmelt Technology for Treating Zinc Residues
Alexander Glinin, Stefanie Creedy, Robert Matusewicz, Stephen Hughes, Markus Reuter

Outotec® Cooling Towers Provide Higher Efficiency and Decreased Emissions
Tuomas Hirsi, Teemu Ritasalo, Antti Saarikoski, Jussi Vaarno, Marko Lahtinen, Sergio Arturo Castro Larragoitia

Increased Productivity of the Secondary Electric Furnace at Aurubis Hamburg
Dr. Ino Bauer, Frank Hoffmeister

Characteristic of Zinc Concentrates and Products of their Roasting in ZGH Boleslaw
P. Kapias, A. Zajączkowski, M. Kamińska, M. Staszewski, M. Fatyga, L. Stencel, B. Ochab

Paste Desulphurization with Ammonium Salts: New Products, New Economics
Dr. Massimo Maccagni
Guido Pizzocri, Massimo Maccagni

Evaluation of Harmful Effects of Impurities in Zn Electrowinning Solution Using Cyclic Voltammetry 559
Prof. Dr. Eng. Hiroaki Nakano, Satoshi Oue, Prof. Emeritus Dr. Eng. Hisaaki Fukushima, Ass. Prof. Dr. Eng. Shigeo Kobayashi, Kazuhiko Nishina, Nobuyoshi Sogabe

Relocation – A Second Opportunity for Zinc Plants 573
Angel Selke, Andrzej Szary

Reforming of a Zinc Containing Gas Mixture with Steam for the Generation of ZnO and H₂ 587
Dipl.-Ing. Alois Unger, Dr. Jürgen Antrekowitsch

Light Metals

Removal of Nickel Impurities from Recycled Mg-Al Alloys by Precipitation of Intermetallic Compounds 597
Dipl.-Ing. Stephanie Duwe, Priv.-Doz. Dr.-Ing. habil. Christiane Scharf, Dr.-Ing. André Ditze

Extraction of Lithium from Zinnwaldite 605
Dipl.-Ing. Jan Ehrig, Prof. Michael Stelter, Dr. Hartmut Bombach, Dr. Gunter Morgenstern, Dr. Michael Scheel

Processing and Heat Treatment Technology of the 6XXX Series Conductor Alloy 615
MSc. Piotr Osuch, PhD Beata Smyrak, Prof. Tadeusz Knych

Influence of Impurities in Secondary Aluminium on Machinability and Anodizing Behaviour 633
Dipl.-Ing. Carina Schlögl, Dipl.-Ing. Dr.mont. Susanne Koch, Univ.-Prof. Dipl.-Ing. Dr.mont. Helmut Antrekowitsch

XVIII}

Proceedings of EMC 2013
Technique for Upgrading Ilmenite Ore via Trivalent Titanium Ion
Hidehiro Sekimoto, Shuhei Yahaba, Yuji Tamada, Katsunori Yamaguchi

Effect of Grain Refiner Additions on Mechanical and Electrical Properties of Aluminium and its Behaviour During Cold Rolling
Andrzej Mamala, Tadeusz Knych, Beata Smyrak, Paweł Kwaśniewski, Grzegorz Kiesiewicz, Wojciech Ściężyń
Process Control/Process Modelling

Introduction of Energy Management at BBH Stolberg and Practical Implementation
Dipl.-Ing. Heiko Ambroz, Dr.-Ing. Urban Meurer

Drastic Energy and Water Reduction in Large Metallurgical Complexes
Osvaldo A. Bascur, Curt Hertler, Nelver Benavides, Michael Halhead

Automatic Pressure Testing of Water Cooled Components in Furnaces
Warren Braun, Jakob Janzen, Brendan Bussell

Optimizing your Non-Ferrous Metal Process with the Right Measurement Mix
Dipl.-Ing Jens Hundrieser

Numerical Tools Optimize Agitators, Vessels and Internals to Ensure Safe and Economic Plant Operation
Dipl.-Ing. Wolfgang Keller, Dipl.-Ing. Jochen Jung, Dipl.-Ing. Nicole Rohn, Dipl.-Ing. Marc Stadtaus

Modelling the Electrolyte Flow in a Full-Scale Copper Electrorefining Tankhouse Cell
Andreas Kemminger, Andreas Ludwig

Latest Developments in Recycling Production Residues Employing Coreless Induction Furnaces
Dr.-Ing. Wilfried Schmitz, Dr.-Ing. Dietmar Trauzeddel

Online Multi-Element Analyses Directly on the Conveyor Belt with CNA
Jerome Gondeau, Jürgen Wess
Waste Heat Recovery by ORC Power Generation

Organic Rankine Cycle Systems: A Techno-Economic Overview 833
M. van den Broek, S. Quoilin, S. Declaye, V. Lemort

Increasing Energy Efficiency and Sustainability in Metallurgical Processes with ORC Technology 845
Dr. Alessandro Fermi, Dipl-Eng. Alessandro Foresti, Prof. Mario Gaia

Florian Heberle, Dieter Brüggemann

Heat to Power: A View on Practical Experience with ORC-Technology 865
Dipl.-Ing. (FH) Christian Scholz-Stahlhofen
